Course Name: Advanced Enterprise Architect

Description: Attendees will be taken through the advanced functionality of Enterprise Architect.

This course is intended for people with Enterprise Architect experience who want to work with the more advanced features and functionality the tool has available.

Duration: 0.5 day

Cost: \$600.00 + GST per person

Included Extras: All attendees will receive training manuals and a completion certificate.

Intended Audience:

1. This course is for people who have an in-depth understanding of Enterprise Architect and want to utilise some of the more advanced features and functionality that are available within the Enterprise Architect application.

Prerequisites:

1. Enterprise Architect for Business Analysts OR extensive experience with Enterprise Architect.

Objectives: At the end of the course attendees will be able to apply some of the more advanced features of Enterprise Architect to their projects.

They will be familiar with creating documentation, be able to add tagged values to store additional information and extend their UML models and create stereotypes and profiles to simplify the way their organisation interacts with their UML models within EA.

Note: This course is not intended to provide any UML training or cover any of the base Enterprise Architect features.

High Level Content:

1. Course Overview
2. Advanced Documentation
3. Stereotypes
4. Tagged Values
5. Shape Script
6. Automatic Notes
7. Metamodels

Maximum Class Sizes: To ensure a high standard of training to all attendees we set a maximum class size of:
Public sessions: 8 attendees
In-house sessions: 12 attendees

Additional Notes: For further information please email us at info@catch.net.nz or visit our website www.catch.net.nz
